RATIFIED RESULTS, LONGINES GRAN PREMIO LATINOAMERICANO AND LONGINES CUP 2019

Today, the Australian laboratory RASL (Racing Analytical Services Limited), disclosed informed OSAF of the results of the 10 samples shipped to be tested for doping, belonging to the winner and 4 runner ups of both Longines Gran Premio Latinoamericano (G1) and Longines Cup Carlos Campino (G2).

All 10 samples resulted free from medication (doping), and therefore the names of the winners and the final scoreboard of both races run on March 10th, are ratified.

OSAF is already making the relevant contacts to pay the prizes to the owners.

This way, OSAF continues the process undertaken back in 2016, where the samples of the prize winners of Longines Gran Premio Latinoamericano are being analyzed by IFHA Reference Laboratories, driven by an anti-doping spirit and aiming at a continuous improvement in the detection of forbidden substances in South America.

We congratulate all contestants and winners.
